

## How Points are used for Booking System Transactions for ATI

To make a booking, you must have the minimum amount of points in your account. This value is set by the terminal.

So the system will check if you have enough points, and this check occurs at three places:

- <u>1. When searching for slots</u>
- 2. When dragging and dropping containers to create bookings
- 3. When confirming the booking

## When searching for slots

When you click the "Search" button on the below screen, the booking system will check your points.
